Typography System

| Role       | Font Family | Size | Weight | Line Height |
|------------|-------------|------|--------|-------------|
| h1         |             |      |        |             |
| fontFamily |             |      |        |             |
| fontSize   |             |      |        |             |
| fontWeight |             |      |        |             |
| lineHeight |             |      |        |             |
| h2         |             |      |        |             |
| h3         |             |      |        |             |
|            |             |      |        |             |

| Role    | Font Family | Size | Weight | Line Height |
|---------|-------------|------|--------|-------------|
| h4      |             |      |        |             |
| body    |             |      |        |             |
| body-sm |             |      |        |             |
| caption |             |      |        |             |

Border Radius (Rounded)

|    |         |         |        |
|----|---------|---------|--------|
| sm | 0.25rem | DEFAULT | 0.5rem |
| md | 0.75rem | lg      | 1rem   |
| xl | 1.5rem  | full    | 9999px |

Spacing Scale

|         |      |      |      |
|---------|------|------|------|
| quarter | 2px  | half | 4px  |
| base    | 8px  | 1.5x | 12px |
| 2x      | 16px | 3x   | 24px |
| 4x      | 32px | 6x   | 48px |
| 8x      | 64px |      |      |

## ■ Documentation & Core Guidelines

---

### Brand & Style

The design system for this product is built on a **Corporate / Modern** foundation with a focus on cognitive clarity and educational efficiency. The brand personality is that of a reliable, intelligent mentor—professional yet approachable. It aims to evoke a sense of organized focus, reducing the "mental load" of the learner through a clean, systematic interface.

The visual style leverages high-quality typography and a spacious layout to maintain a calm atmosphere for deep learning. It uses subtle shadows and soft radii to create a tactile, approachable feel, while the use of OKLCH-derived colors ensures a vibrance that feels modern and high-tech without being overwhelming. The interface emphasizes "Mastery" through a clear semantic color language, allowing users to intuitively grasp their learning progress at a glance.

#### Colors

The color palette is architected around a "Trust/AI" blue as the primary driver for action and brand recognition. Semantic colors are critical for this system, as they map directly to the "Mastery" levels of the AI planner:

**Primary (#0069a8):** Used for main actions, active navigation states, and core branding.

**Success (#009966):** Represents "Strong" mastery and positive progress.

**Warning (#f79d00):** Represents "Learning" states or active focus sessions.

**Danger (#e7000b):** Flags "Weak" mastery or destructive actions.

**Neutral (#f1f3f3):** Used for surface accents and subtle borders.

The default mode is **Light**, utilizing a pure white background for maximum contrast and readability, while the dark mode (for late-night study) transitions to a deep Navy (#090b0c) to minimize eye strain.

#### Typography

This design system utilizes the **Geist** font family exclusively. This mono-linear, high-legibility typeface bridges the gap between technical precision and human readability. The hierarchy is structured to support information-dense environments. Bold H1s are reserved for page entry points, while H3 and H4 roles handle the majority of card-based titling. Body text is set with a generous 150% line height to ensure long-form educational content is comfortable to consume. On mobile devices, H1 should scale down slightly to avoid excessive wrapping, while body sizes remain constant for accessibility.

#### Layout & Spacing

The layout follows a **8px base unit** spacing rhythm. This ensures mathematical harmony across all components and viewports.

A **12-column fluid grid** is recommended for desktop views, transitioning to a **4-column grid** for mobile.

**Margins:** 24px (Desktop) / 16px (Mobile).

**Gutters:** 16px constant.

**Component Spacing:** Use **base (8px)** for internal element grouping and **2x (16px)** or **3x (24px)** for section-level spacing.

Cards and content containers should utilize the **3x (24px)** padding value to maintain a premium, airy feel that prevents the UI from feeling cluttered during intensive study sessions.

### Elevation & Depth

Elevation is conveyed through a mix of **Tonal Layers** and **Ambient Shadows**.

The background is kept flat white, with cards and "Mastery Nodes" sitting just above the surface.

**Default State:** A very soft, low-opacity shadow ( **0px 1px 2px rgba(0,0,0,0.05)** ) provides a slight lift.

**Interaction/Hover:** For interactive elements like cards, the shadow deepens and diffuses ( **0px 4px 6px rgba(0,0,0,0.1)** ) accompanied by a subtle -2px Y-axis translation to simulate physical lifting.

**Modals:** Use a **Glassmorphism** approach for the backdrop, featuring a 10% black overlay with a backdrop-blur effect (8px-12px blur radius) to focus the user's attention on the dialog without losing environmental context.

### Shapes

The shape language is deliberately soft to counteract the "strictness" often associated with AI and learning.

**Small (8px):** Applied to utility components like checkboxes and small decorative accents.

**Medium (11px):** The standard for action-oriented elements including Buttons and Input fields. This specific radius creates a distinct, custom feel.

**Large (14px):** Used for the primary containers of the system—Cards, Modals, and the "Mastery Concept Nodes."

**Pill (9999px):** Reserved strictly for Badges and Chips to differentiate them as status indicators rather than interactive buttons.

### Components

#### Buttons

**Primary:** Solid #0069a8 background, white text. Hover state deepens the blue slightly.

**Secondary:** Neutral #f4f4f5 background, #090b0c text.

**Outline:** 1px border using #f1f3f3, transparent background.

**Destructive:** Solid #e7000b background.

**Loading:** Use the current button variant with a centered spinner icon; disable pointer events.

**Radius:** Always 11px.

#### Input Fields

**Default:** 1px border (#f1f3f3), 11px radius, 8px/12px padding.

**Focused:** Border color transitions to #9ca8ab (Text Muted) with a subtle ring glow.

**Error:** Border color changes to #e7000b.

#### Mastery Concept Nodes

These are specialized cards representing learning units:

**Strong:** Success green border/accent.

**Learning:** Warning yellow border/accent.

**Weak:** Danger red border/accent.

**Untested:** Neutral gray border/accent.

**Radius:** 14px for a soft, approachable card appearance.

#### Badges

**Style:** Pill-shaped (9999px), high-contrast text on a lightened version of the semantic color.

**Variants:** Primary, Success, Warning, Danger, Neutral.

#### Sidebar & Navbar

Use the **Secondary** or **Neutral** colors for background surfaces to distinguish from the primary white content area.

Active links should use the **Primary** blue for both the icon/text and a subtle vertical indicator bar.

#### Dialog / Modal

Content boxes must have **24px padding** and **14px radius**.

The backdrop must feature a 10% black overlay with **backdrop-blur**.
